SKILLS

- **Languages:** Python, C, C++, SQL
- **Data Science:** Data Cleaning & Preprocessing, Exploratory Data Analysis (EDA), Statistical Analysis, Feature Engineering, Data Interpretation
- **Machine Learning:** Supervised & Unsupervised Learning, Model Evaluation (Accuracy, Precision, Recall, F1-score)
- **Python Libraries:** Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, TensorFlow, Requests
- **Framework/Platform:** Flask, Git & GitHub, MySQL, DBMS, Jupyter Notebook, Excel, Power BI, Docker
- **Core Concepts:** Data Structures & Algorithms, Computer Networks, Hypothesis Testing
- **Soft Skills:** Problem-Solving, Adaptability, Active Listening, Communication

PROJECTS

- **Plant Disease Detection | [GitHub](#)** Jul' 2025 – Sept' 2025
 - Developed a Multi-Class Classification model using Convolutional Neural Networks (CNN) to detect plant diseases across 5 major crops (Tomato, Apple, Cherry, Walnut, Radish)
 - Processed and normalized a large-scale dataset of 72,500 images, categorizing them into 28 distinct disease classes (including 10 specific tomato pathologies).
 - Optimized model architecture to achieve a 93% Validation Accuracy, significantly reducing false positives in disease identification.
 - Conducted rigorous error analysis to improve model performance on similar-looking leaf textures, ensuring high precision for real-world agricultural application.
Tech: Python, TensorFlow, OpenCV, CNN
- **Crop Guidance System | [GitHub](#)** Jul' 2025 – Aug' 2025
 - Built a predictive model using Random Forest/Decision Trees to recommend optimal crops based on soil conditions and climatic data.
 - Automated the extraction of real-time agricultural data using Selenium, creating a robust pipeline that preprocessed and normalized unstructured web data.
 - Analyzed feature importance of key soil parameters (NPK, pH, Rainfall) to derive actionable insights, potentially aiding farmers in reducing fertilizer wastage by 15-20% through precise crop matching.
 - Deployed the machine learning model via a Flask API, enabling real-time inference and data flow for end-users.
Tech: Flask, Pandas, Scikit-learn, Selenium, REST APIs

SUMMER TRAINING

- **FRONT-END WITH REACT.JS | [Gokboru Tech](#) | [GitHub](#)** Mar' 2025 – Apr' 2025
 - Gained hands-on experience in HTML, CSS, JavaScript, responsive design, and modern UI frameworks, progressing from fundamentals to advanced front-end development.
 - Built multiple real-world projects, including a Recipe Search Web App using APIs and an Online Quiz Application using React.js, Hooks, and State Management (Context API/Redux).
 - Worked with industry practices such as DOM manipulation, ES6+, React Router, asynchronous programming, and API integrations, strengthening full front-end development workflow understanding.

CERTIFICATES

- The Complete Python Pro Bootcamp by Angela Yu | [Udemy](#) Oct' 2025
- Social Networks | [NPTEL](#) Apr' 2025
- Data Structures and Algorithms (72 hours) | [Iamneo](#) Dec' 2024
- The Bits and Bytes of Computer Networking | [Coursera](#) Sep' 2024
- Introduction to Hardware and Operating Systems | [Coursera](#) Sep' 2024

ACHIEVEMENTS

- **HackerRank | [Link](#)**
5★ in Python, 5★ in C, and 4★ in SQL, demonstrating strong language-specific expertise.
- **LeetCode | [Link](#)**
Solved 100+ Data Structures and Algorithms problems on LeetCode, maintaining a 61-day solving streak.

EDUCATION

- **Lovely Professional University** Phagwara, Punjab
Bachelor of Technology - Computer Science and Engineering; **CGPA: 7.7**
Aug' 2023 – Jul' 2027 (Expected)
