SKILLS

- **Languages:** Python, C, C++, SQL
- **Data Science:** Data Cleaning & Preprocessing, EDA, A/B Testing, Hypothesis Testing, Hyperparameter Tuning, Statistical Analysis, Feature Engineering
- **Machine Learning:** Supervised & Unsupervised Learning, Neural Networks, Ensemble Learning (Random Forests, XGBoost), Model Diagnostics (Bias/Variance)
- **Python Libraries:** Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, TensorFlow, BeautifulSoup
- **Framework/Platform:** Flask, Power BI, Git & GitHub, DBMS, Excel
- **Soft Skills:** Problem-Solving, Adaptability, Active Listening, Communication

PROJECTS

- **Plant Disease Detection** | [GitHub](#) | [Live](#) Jan' 2026 – Mar' 2026
 - Developed an end-to-end hybrid deep learning pipeline using VGG19 (Transfer Learning) as a feature extractor combined with SVM classifiers to diagnose diseases across 17 different crop types.
 - Engineered a per-crop classification system that handles high-dimensional feature vectors (512-dim), achieving a peak validation accuracy of 99.5% (Lychee) and 99.2% (Radish).
 - Implemented automated data augmentation (rotation, zoom, shear) to address class imbalance for rare pathologies, ensuring model robustness against varied environmental conditions.
 - Built a user-centric diagnostic interface using Gradio, providing farmers with real-time reports including biological causes, severity levels, and actionable chemical/organic remedies.
Tech: Python, TensorFlow, Scikit-Learn (SVM), OpenCV, NumPy
- **Telecom Call Quality Analysis Dashboard** | [GitHub](#) | [Live](#) Dec' 2025 – Jan' 2026
 - Developed an end-to-end Power BI dashboard to evaluate the performance of major Indian telecom operators (Jio, Airtel, Vi, BSNL) using real-time Voice Call Quality datasets from the data.gov.in API.
 - Engineered an automated ETL pipeline using Python to scrape and clean unstructured consumer feedback data, standardizing regional and operator-specific metrics for multi-year trend analysis.
 - Implemented a custom "Defect Scoring" algorithm using DAX to rank network reliability across Indoor, Outdoor, and Travelling scenarios, identifying critical failure zones through dynamic heatmap visualizations.
 - Analyzed the impact of the 5G rollout (2022–2024) on call stability and voice quality, providing data-driven insights into market share shifts and operator-wise performance improvements across Indian states.
Tech: Power BI, DAX, Python (Pandas, Selenium), REST APIs
- **Crop Guidance System** | [GitHub](#) | [Live](#) Sep' 2025 – Dec' 2025
 - Built a predictive model using Random Forest/Decision Trees to recommend optimal crops based on soil conditions and climatic data.
 - Automated the extraction of real-time agricultural data using Selenium, creating a robust pipeline that preprocessed and normalized unstructured web data.
 - Analyzed feature importance of key soil parameters (NPK, pH, Rainfall) to derive actionable insights, potentially aiding farmers in reducing fertilizer wastage by 15-20% through precise crop matching.
 - Deployed the machine learning model via a Flask API, enabling real-time inference and data flow for end-users.
Tech: Flask, Pandas, Scikit-learn, Selenium, REST APIs

CERTIFICATES

- The Complete Python Pro Bootcamp by Angela Yu | [Udemy](#) Oct' 2025
- Social Networks | [NPTEL](#) Apr' 2025
- Data Structures and Algorithms (72 hours) | [Iamneo](#) Dec' 2024
- The Bits and Bytes of Computer Networking | [Coursera](#) Sep' 2024
- Introduction to Hardware and Operating Systems | [Coursera](#) Sep' 2024

ACHIEVEMENTS

- **HackerRank** | [Link](#)
5★ in Python, 5★ in C, and 4★ in SQL, demonstrating strong language-specific expertise.
- **LeetCode** | [Link](#)
Solved 75+ Data Structures and Algorithms problems on LeetCode, maintaining a 61-day solving streak.

EDUCATION

- **Lovely Professional University** Phagwara, Punjab
Bachelor of Technology - Computer Science and Engineering; **CGPA: 7.7** Aug' 2023 – Jul' 2027 (Expected)
